Succose novità dalla ET Model, per il contenuto di ogni singolo set vi rimando alle foto in allegato

Da segnalare la presenza in alcune confezioni di particolari in resina e parti in metallo.

Ad esempio nei set EA35-067 e EA35-069 vengono fornite le molle in metallo per i parafranghi.

Il set E35-091 dedicato al Pz.Kpfw.IV Ausf.J per realizzare le Schurzen di tipo Thoma è da urlo, a differenza degli altri set di altre ditte presenti sul mercato qui troviamo anche le protezioni della torretta e due tubetti in ottone dove si applicheranno le Schurzen.

Vista la finezza dei dettagli e la complessità per alcuni passaggi di montaggio consiglio a tutti di provare ad usare per il montaggio il saldatore invece della ciano !
