- EA35-064 Modern NATO Bastion Cage Barrier Set Type.2 COMMON
- EA35-065 Modern NATO Bastion Cage Barrier Set Type.3 COMMON

Questa volta i soggetti spaziano dal moderno alla Seconda Guerra Mondiale, Ormai questo produttore ci ha abituati bene, all'interno di ogni confezione troviamo spesso particolari in resina e fili in metallo per simulare i cavi di traino. Diciamo che in ogni set c'è il necessario per valorizzare al massimo i nostri modelli, ormai il livello raggiunto nel campo delle fotoincisioni è diventato alto, il metallo usato pur essendo molto fine risulta anche molto resistente

Anche i dioramisti questo volta saranno accontentati, gli ultimi set sono dedicate a loro.

La ET Model ci propone tre diversi tipologie di strutture metalliche per simulare, barriere di rinforzo, posizioni difensive, posti di blocco ecc. Ogni confezione comprende le reti in materiale fotoinciso e un foglio di carta da tagliare da mettere all'interno della struttura, sarà poi nostra cura riempirlo di sabbia o pietrisco.
